INTRODUCTION

I am a designer from the Pacific Northwest with a focus on purposeful design, user experience methodologies, and accessible interaction design. I have worked for a number of high profile companies, such as Microsoft, T-Mobile, and F5. I am looking forward to bringing value to your team with a collection of crucial design skills, a proven record of strong developer collaboration and an aptitude for rapid iteration.

EXPERIENCE

MAR 2024 -
PRESENT

Microsoft *Senior Product Designer*

Designing for product revolution in the AI era, I have been able to deliver explorations and hand-offs for a variety of enterprise domains, including finance, supply chain logistics, sustainability reporting, government contracting, and partner software vendors. Each required interfacing with cross functional contributors on world-class product teams, as well as an aptitude for quickly gaining expertise in complex domains.

DEC 2021 -
JULY 2023

Prior, was the primary designer responsible for the design strategy and execution for Microsoft's large scale software cloud for the nonprofit sector. My work primarily focused on AI experiences as well as streamlining data insights and consumption.

DEC 2020 -
PRESENT

Revel Consulting *Interaction Designer*

Work with a variety of clients in the Greater Seattle on improving their digital experiences and customer touchpoints. Collaborated with researchers, content writers, other designers and developers. Leveraged user centered design principles and design thinking to solve problems.

FEB 2019 -
JULY 2020

Microsoft *Contract Product Designer*

Owned the design for a number of products and features within the Business Application Platform.

+ 3 other positions dating back to February 2015
